*Never Mind the Watts*

You are entitled to know the honest, accurate rating of your tubes on a basis of power output, NOT watts input. Only thus can you determine the signal strength at the receiving end—let's not kid ourselves. HYTRON transmitting tubes have always observed this rating ritual, based on sound engineering concepts—your protection against buying "a pig in a poke".

CHAMPION McELROY

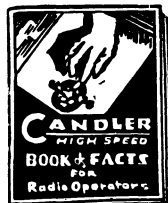

McElroy says: "Practice alone will not develop your **Co-Ordinative Faculty**, necessary to skill and speed. You must be taught how to practice—to use your **MIND**—as I was taught by **CANDLER**. His system is the easiest way I know to learn code **RIGHT** and to acquire skill and speed."

CHAMPION JEAN HUDSON  
W3BAK

At age of 9 Jean won championship in Class E. At age of 14 she won championship at Asheville tournament in Class B. Jean copies 45 wpm on her "mill" easily.

# Speed Up Your Code

The New **CANDLER SYSTEM** Will Train You at Home to Read Code at High Speeds Like You Read Print

The New **BOOK of FACTS** for Code Students, Amateurs and Radio Operators Will Be Sent to You Without Cost or Obligation.

Contains inside advice and tips from the champions and world's fastest Amateur and Commercial ops. They tell you how to quickly develop Skill and Speed. Contains information on License Requirements and a list of **QUESTIONS**, many of which will be asked you by the R. I., when you take your exam. This book is of great value to you, and it costs you nothing. A postal will bring it to you.

If you've practiced and practiced but can't get over the "hump" that seems to be your limit—don't be discouraged. Thousands of skilled operators have had the same experience. Some thought they were dumb; others thought they weren't "gifted." But you should see those fellows today! They can send beautiful code and copy fast press 4 to 8 words behind without conscious effort or strain. Those fellows have *Automatic Sound Consciousness*—and they got it through **CANDLER Training**!

## No Expensive Practice Sets Needed For Candler Training

Learning to Send and Receive Code Rapidly, skilfully is a Mental Process that requires Mind Training such as only **CANDLER** can give you. Practice of any kind without this Specialized Training is like trying to learn electricity without a knowledge of *Ohm's Law*. **CANDLER** shows you the easy, interesting way to Speed, Skill, and that Amateur or Commercial License in half the usual time.

McDONALD, W8CW

McDonald says: "Of course, practice is necessary, but without the proper training such as **CANDLER** gives, practice may lead in the wrong direction. I owe my speed to Candler Training."

WALTER H. CANDLER  
Originator of the famous Candler System and founder of the Candler System Company.

**RELAYS** by **GUARDIAN**  
now being diverted to **DEFENSE...**

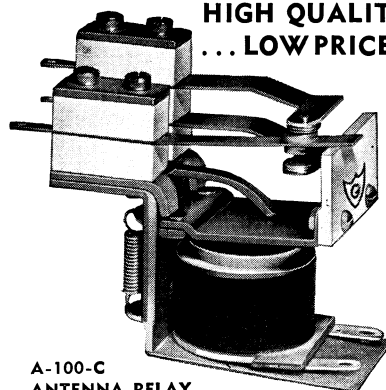

★ Now engaged in the greatest output of relays in its history—Guardian Electric has greatly expanded plant and production facilities to meet the needs of National Defense.

Materials formerly used in relays for amateur use, are now being diverted to vital defense control equipment. The result . . . a strong demand and a shrinking supply of Radio Relays by Guardian.

If your jobber can't furnish Relays by Guardian, remember that national defense comes first. Bear in mind that no inferior substitutes are used . . . that Guardian has never sacrificed quality for quantity . . . never traded value for volume . . . that Relays by Guardian will again be available when the priority grip relaxes.

**RELAYS by GUARDIAN**

**A-100-C  
ANTENNA RELAY**

Single Pole — Double Throw. AISiMag insulated. Same rating as A-100. For single wire fed antenna installations, two A-100-C's in place of an A-100 will avoid possible mismatch caused by distorting two-wire systems, to provide for single relay installation.

**HIGH QUALITY** ★ Prepare—buy Relays  
**... LOW PRICED** by Guardian that last longer and you'll buy relays less often. Your jobber still has some. Famous for sturdy construction and dependable operation . . . easily mounted in any position . . . these precision engineered Antenna Relays by Guardian, tested under actual operating conditions will handle any power up to 1 k.w. on any frequency up to (and including) 28 MC on AF or RF circuits.

## ..for Dependability

Illustrated above are inductors for the Columbia Broadcasting System and the National Broadcasting Company for 50 KW applications. In the upper photo insulation is Alsimag 196 and in the lower two Mycalex is used. Note the one foot triangular scale in the lower left-hand corner of the upper photo.

Not every application demands an inductor rated at 50 KW, but the same Engineering skill and precision workmanship may be found in all Johnson Products. Where dependability is of paramount importance, those who know specify Johnson, whether it is a standard stock part or an especially Engineered and manufactured component. **WL** Since the first Ward Leonard Resistors, manufactured on a commercial basis in 1892, all the electrical communications in this country have used Ward Leonard Products. The history of these developments is the history of Ward Leonard. First the telegraph, then the telephone and now wireless, both amateur and professional.

### A FEW OF THE MANY THINGS YOU CAN DO

1. Automatically switch the transmitting antenna for receiving with the W.L. Change-over Relay.
2. Hold in a push button for transmitting and release for receiving with the W.L. Push-to-talk Relay.
3. Satisfy the non-load-dumping regulation while tuning by equipping the rig with W.L. non-inductive, non-capacitive dummy antenna Plaque Resistor.
4. Minutely adjust to resistance value required by the use of a W.L. Adjust-ohm Resistor.
5. Enjoy extreme flexibility of operation by the use of W.L. Midget Remote Control Relays.
6. Minutely control a circuit with a W.L. Ring Type Power Rheostat.
7. Meet any resistance requirement with the W.L. line of Resistors.
